CO<sub>2</sub>, fuel consumption, electric energy consumption and equivalent all-electric range values will vary dependent on vehicle specification.

Build your BMW, view the CO<sub>2</sub>, fuel consumption, electric energy consumption and equivalent all-electric range figures for your chosen model and decide the specification using the [online configurator](#).

\* = For plug-in hybrid vehicles these figures were obtained using a combination of battery power and fuel. Plug-in hybrid vehicles require mains electricity for charging. WLTP figures shown are for comparability purposes. Only compare fuel consumption, CO<sub>2</sub> and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load. WLTP has been used as the applicable CO<sub>2</sub> figure from 1 January 2024 for Vehicle Registration Tax (VRT).

<sup>^</sup> = Combined power from Petrol and Electric engines.
