$\rm CO_2$ and fuel consumption values will vary dependent on vehicle specification.

Build your BMW, view the CO_2 and fuel consumption figures for your chosen model and decide the specification using the <u>online configurator</u>.

* = WLTP figures shown are for comparability purposes; only compare fuel consumption and CO_2 figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. WLTP has been used as the applicable CO_2 figure from 1 January 2024 for Vehicle Registration Tax (VRT).

 $^{+}$ = 48V Mild Hybrid Technology provides many benefits including improved recovery of kinetic energy during braking and support of the combustion engine when accelerating. This helps to reduce CO₂ emissions whilst improving fuel consumption and performance.
